- Other conditions, including V-codes, that may be a focus of Clinical Attention. (Except medication induced movement disorders which are included.)

A beneficiary may receive services for an included diagnosis when an excluded diagnosis is also present.

B. Impairment Criteria

Must have one of the following as a result of the mental disorder(s) identified in the diagnostic (“A”) criteria:

Must have one, 1, 2, or 3:

1. A significant impairment in an important area of life functioning, or
2. A probability of significant deterioration in an important area of life functioning, or
3. Children also qualify if there is a probability the child will not progress developmentally as individually appropriate. Children covered under EPSDT qualify if they have a mental disorder which can be corrected or ameliorated (current DHS EPSDT regulations also apply).

C. Intervention Related Criteria

Must have all, 1, 2, and 3 below:

1. The focus of proposed intervention is to address the condition identified in impairment criteria “B” above, and
2. It is expected the beneficiary will benefit from the proposed intervention by significantly diminishing the impairment, or preventing significant deterioration in an important area of life functioning, and/or for children it is probable the child will progress developmentally as individually appropriate (or if covered by EPSDT can be corrected or ameliorated), and
3. The condition would not be responsive to physical healthcare based treatment.

EPSDT beneficiaries with an included diagnosis and a substance related disorder may receive specialty mental health services directed at the substance use component. The intervention must be consistent with, and necessary to the attainment of, the specialty MH treatment goals.
