

**SB 678 Data Reporting**

Senate Bill 75 made changes to the SB 678 program including the addition of new data collection requirements. Pursuant to Penal Code § 1231(d), in addition to data regarding felony probationers, the Administrative Office of the Courts (AOC) will also collect data on individuals supervised on post release community supervision (PRCS) and mandatory supervision. The table below contains all data points the AOC must collect quarterly with new data points highlighted in yellow.

If an individual is on multiple supervision types the following hierarchy should be used:

- 1) Felony probation
- 2) Mandatory supervision
- 3) PRCS

For example, if an individual is on both felony probation and PRCS they should be counted in all data points regarding felony probation and should be excluded from all data points regarding PRCS. Please note that this hierarchy is different than the hierarchy used by CPOC.
